Software/components /SDK/tools	MochaSoft, Pycharm, PhpStorm

PROJECT DETAILS→

APN Project

Duration June 2014 – Current

Description This is a web based application which is responsible to make real time bill payment for the customer. It is an enhance application which cover millions of customers living in Florida or outside. This application updates the mainframe DB2 at real-time and generate the receipt according the customer account type and other validation. This application gives control to the internal user to make changes in Pay agents. This application also provides the location of all the pay agents who are nearby to the customer area by using google API. This application also has features to add new users, add new agents and a lot more. Front end is designed in .net platform. We are using web service to communicate with mainframe as it makes it as platform independent. Front end can be in any technology and the intermediate is FUSION which communicate with MF and front end application. The Mainframe part is design in such a way that it can get request form any validated front end application, MF will identify it by using some predefined key in the input field. At the end of the day, the payment made in a day will get realize to all DB2 tables and will get reflect everywhere (CICS applications).

Responsibilities Team Member (Developer)
Worked on creation of Functional Design.
Good analytical skills.
Analyzing the requirements.
DB2 table design.
Develop programs.
Create UAT and test them
Bug Fixes
Handling Client Calls
Support System testing
Monitor Omegmon for storage violation in production during first run
Production Support and provide solution instantly
Follow Agile methodology

Created 8 program from scratch; 1 web service based online and 7 batch program
CICS screen change enhancement

OTHER ACTIVITIES→

1. I am Anchor of Knowledge management in my Account.

Responsibilities: -

- Provide KT's to all newly join persons in account,
- Arrange exams to test the knowledge of all newly join persons.
- Take Reverse KT's and provide their feedback to the managers.
